General remarks.—The year 1940 was comparatively a better year from public health point of view. The increase in the total mortality in the province compared to the preceding year was mainly atrributable to malaria and the unspecified causes, while the deaths from other diseases either came down or remained practically the same as in the previous year. An outstanding feature of the health condition of the province during the year under review as already pointed out, was the lowest mortality from cholera recorded during the past fifty years. It will be observed from the foregoing paragraphs that the Ministry of Health have framed definite schemes for combating malaria, the principal problem of the province and also other epidemic diseases which constitute the greatest menace to public health and to reorganise the public health services of the province for advancement of personal and environmental hygiene, health, education and consciousness. Government trust that the local bodies, associations as well as the public in general will offer their unstinted help and support in these matters.

Personal.—Lt.-Col. A. C. Chatterjee, I.M.S., held the office of Director of Public Health thoughout the year. Government desire to place on record their appreciation of the services of Lt.-Col. Chatterjee and his staff in efficiently administering the department during the year under review.

PRESS COMMUNIQUE.

8, Clive Street, Calcutta, the 10th April 1942.

Price of garnet lac and button lac.

There has been a marked rise in the price of shellac during recent months. Shellac T. N. which was sold at Rs. 14 per maund at Calcutta in August 1939 was quoted in the first week of March 1942 at Rs. 68 per maund, that is, about five times the pre-war price. Shellac is an important war material and is consumed to the extent of one-third of its total output by Indian industries engaged in war production while large quantities are exported to Empire and allied countries for use in munitions industries. The abnormal rise in the price of shellac therefore compelled the Government of India to bring the prices under control in the interest of the efficient prosecution of the war and the maximum price of shellac T. N. at Calcutta was fixed by them at Rs. 66-8 per maund. On the basis of this price, the maximum prices of garnet lac and button lac have been fixed by the Government of Bengal at Rs. 71-8 and 72-8 per maund respectively, *vide* the annexed order issued by the Chief Controller of Prices, Bengal.

Order.

In exercise of the power conferred by clause (*b*) of sub-rule (*2*) of rule 81 of the Defence of India Rules, which has been directed to be exercised by me by notification No. 463P., dated the 13th January 1942, I hereby direct that the maximum price of garnet lac and button lac in the town of Calcutta as defined in section 3 of the Calcutta Police Act, 1866, together with the suburbs of Calcutta as defined by notification under section 1 of the Calcutta Suburban Police Act, 1866, shall, with effect from the date mentioned against each, be as follows:—

PRESS COMMUNIQUE.

8, Clive Street, Calcutta, the 20th April 1942.

Price of sand.

"Silver" sand is now required in large quantities for filling sand bags for A.R.P. purposes. There is a tendency on the part of dealers to profiteer at the expense of consumers by the sale of this variety of sand. It is therefore considered necessary to fix a maximum price for it and the Chief Controller of Prices, Bengal, has accordingly issued the annexed order to-day fixing the maximum price of half a cubic foot of silver sand, *i.e.*, the quantity ordinarily required for filling a sand bag, at 0-1-6.

Order.

In exercise of the power conferred by clause (*b*) of sub-rule (*2*) of rule 81 of the Defence of India Rules, which has been directed to be exercised by me by notification No. 463P., dated the 13th January 1942, I hereby direct that the maximum price of half a cubic foot of silver sand in the town of Calcutta as defined in section 3 of the Calcutta Police Act, 1866, together with the suburbs of Calcutta, as defined by notification under section 1 of the Calcutta Suburban Police Act, 1866, shall, with effect from the date of the notification, be 0-1-6 (one anna and six pies) only.

Third Forecast of the Wheat Crop of Bengal, 1941-42.

Ramna, Dacca, the 23rd April 1942.

(*Note.*—On an average of the five years ending 1939-40, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to total wheat acreage in (*a*) British India and (*b*) in the territory now reported on, has, in the five years ending 1939-40, averaged (*a*) 45·3 and (*b*) 8·5 per cent., respectively.)

Character of the season.—Since the issue of the Second Forecast in February last there has been no appreciable change in the condition of the crop. Drought affected the crop at important stages of its growth. The present condition of the crop is on the whole fair.

Acreage.—According to the estimates of the District Officers, the total area sown comes to 170,000 acres this year as against 169,100 acres both in the corresponding and final forecasts of last year.

Outturn.—The average provincial outturn as worked out from the districts' estimates is 76 per cent. as against 60 and 57 per cent. in the corresponding and final forecasts of last year.

Taking the normal yield to be 9-3/5 maunds per acre, the gross yield of the crop for the province works out to 45,600 tons as against 35,800 tons and 34,000 tons respectively in the corresponding and final forecasts of last year.
